

# Vahana.jl Workshop

Part 0 - Hands-On setup

Steffen Fürst

Scaling Complexity Workshop  
Berlin, 03.12.2024

# Setup

Create a project at JuliaHub:

1. From the Home page, click "Launch Julia IDE"
2. Select "Connect to Julia IDE" (connection may take a few minutes)
3. Wait for the VSCode IDE to initialize and for VSCodeServer precompilation to complete
4. Press ; to enter the shell mode
5. Run the following commands:

```
git clone https://github.com/s-fuerst/Vahana-Workshop.git  
julia Vahana-Workshop/install-packages.jl
```

Note: Package installation may take several minutes to complete.

Optional: Install the "Papyrus PDF Preview" extension to view the presentation slides directly within the IDE
